

PNCWA WAVE PROGRAM

LEADING THE FUTURE OF WATER

The WAVE Program engages students and emerging professionals from diverse backgrounds with the water industry through a series of skills building workshops and attendance of the PNCWA conference, with the goal of empowering participants to contribute to the future of water through creating a sense of belonging, developing skills and opportunities.

The program consists of a five-part workshop series followed by sponsored attendance of the PNCWA 2024 Annual Conference taking place in Boise, Idaho September 8-11, 2024. The five workshops focus on information related to the water/wastewater industry, networking, skills development, employment opportunities, and conference preparation with presentations from a variety of water professionals.

As a PNCWA WAVE participant, you will have a unique opportunity to learn from water and wastewater leaders across the Pacific Northwest, practice critical leadership and communication skills, and develop a strong network of peers and mentors.

PROGRAM EXPECTATIONS

Attend five 2-3 hour virtual skills workshops between January and September 2024.
